**network and
infrastructure operations**

WHY YOU SHOULD WORK WITH US

QUALITY

We handpick our engineering teams for each project, who fulfill our clients' needs most effectively at the highest level. We ensure the excellence of our software via extensive automated testing.

SPEED

Our creative technical proposals save our clients a wealth of time and money. Our projects are spearheaded by a dedicated lead developer, thereby providing frictionless and fluent communication.

ADAPTABILITY

Over the past twenty years we've acquired a wide range of international relations with companies providing similar services. Our teams are smoothly scalable by the virtue of our network; we are able to expand our team by up to another 25 contractors should it prove necessary.

BUSINESS EXPERIENCE

CONSULTING

We assess our clients' IT infrastructure and present personalized solutions to further improve their products and services.

DEVELOPMENT AND OPERATION OF CORPORATE GOVERNANCE SYSTEMS

We've operated the corporate governance system responsible for optimizing production at Procter & Gamble Hungary for over 8 years. Further references: Metro, 220Volt

BUILDING AND OPERATION OF IT INFRASTRUCTURE

We operate the entire IT infrastructure of the American recycling firm TerraCycle, spanning a network of 21 countries. Further references: 220Volt

APPLICATION DEVELOPMENT

We develop high traffic software for the services of TerraCycle in 21 countries, from UX design to databases and mobile applications. We've built our IT team adapting to the dynamically growing development needs over the past years for the company. Further references: Hand In Hand Foundation, ELTE Origo Language Centre, 220Volt, Shinrai, Zetland

E-COMMERCE

We delivered our first commissioned webshop in 2000. We understand and utilize the systems of distinct Hungarian banks and delivery companies in order to create fully fledged e-commerce systems.

TEAM

25 developers

Our **8 senior** developers have professional experience ranging 15-20 years. Along with them, **12 medior** and **5 junior** developers invigorate our teams.

6 managers

Our managers were hardened in international projects, they are highly skilled foreign language speakers and have in-depth knowledge of agile methodologies.

TECHNOLOGY STACK

We choose the most applicable and cost-effective solutions from our toolkit for each project.

Ruby On Rails:

An open source software framework of countless benefits with extensive community support and flexibility, with which we are able to realize any client request.

Cloud, Python, Node, Go, React, Vue, GraphQL, Blockchain

We continuously follow and apply bleeding edge technologies. We select only the most applicable tools for the job in our design.
